

RAeS Hamburg in cooperation with the DGLR, VDI, ZAL & HAW invites you to a lecture

## Ergonomics in the Aviation Industry

Dipl. Ing. **Klaus Fuchs**, Senior Ergonomist,  
Plant Hamburg, Airbus

**Date: Thursday 9 May 2019, 18:00**

**Location: HAW Hamburg Berliner Tor 5, (Neubau), Hörsaal 01.13**

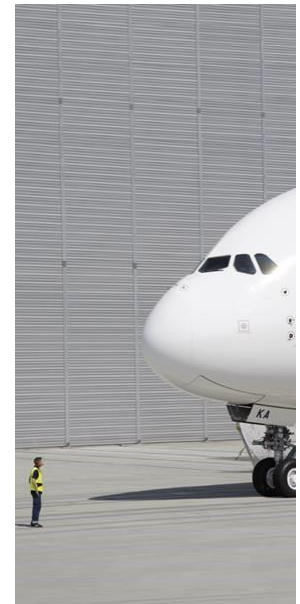

Lecture followed by discussion  
No registration required !  
Entry free !

Airbus is a continuing success story. With a 50-year track record of innovation, technological firsts and industry milestones.

But like 50 years ago, it's the worker, who is in charge to produce each aircraft reliably in a safe and responsible manner. People make the difference in the production process with their individual abilities, skills and capabilities. It's them, who can master tasks which cannot be solved by machines. Keeping these workers healthy and productive throughout their entire working life is a challenge. Airbus provides this environment and is ready for the demographic change.

Good ergonomic processes in existing working environments and the integration of ergonomics in early PDP are an enabler to secure our future.

Since 2011 Klaus Fuchs has been Senior Ergonomist at the Plant Hamburg. From 2006 to 2011 he was a research associate at the Institute for Ergonomics and Human Factors "IAD" in Darmstadt.
